How To Design Your Best Life, and Then Live It!

At age 13 I learned a valuable lesson about success. I learned that IQ had nothing to do with success as I experienced the death of my grandfather who had a certified IQ of a genius at 160. When he died, he was alone, in an alcohol rehab center with only a plastic red wallet and social security card in it. He was broke and broken.

I made a decision at that time that I would not repeat the mistake he made of being given so much talent and then squandering it and dying with his song still in him.

Most men lead lives of quiet desperation and go to the grave with the song still in them.
Henry David Thoreau

You too know many people who have not let their song out don't you? You know people who are frustrated with their career or business, their finances, their relationships or their health and who live well beneath their God given talents and gifts. You may be one of them.

I created Total Success Institute LLC to empower people to sing their song, and design the life that they can and want to live.

I want to personally invite you to come and learn more about how you can design and live your best life and how we may assist you in doing so.

It will be seven hours that will be for some the most valuable seven hours of their life because they will make choices that will alter their lives forever. It will not be like any other lecture or workshop you've been to.

You are always one decision away from an amazing life.

Make the choice to come and experience what it's like to begin living a Totally Successful Life. Invite a friend or a spouse. I look forward to meeting you in person.

If not you then who? If not now then when?

Cliff Stockamp
CEO and Founder of Total Success Institute LLC
Specializing in Professional and Small Business Coaching
